**◆EXCALIBUR** 

SLTS113

(Revised 11/30/2000)

• Single-Device: +5V/3.3V input

- Remote Sense
- +5V & +3.3V Input Voltage
- Adjustable Output Voltage
- 23-pin Space-Saving Package
- Solderable Copper Case

The PT6910 series is a series of high performance 12 watt, plus to minus voltage convertors that are designed to power the latest ECL (–5.2V) and

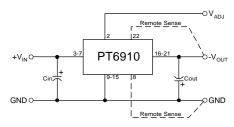

GaAs (-2.0V) ICs from an existing +5.0V or +3.3V source.

These regulators are similar to the popular PT6900 series with the added feature of Power Trends' unique solderable copper case.

A 330µF electrolytic capacitor is required on both the input and output for proper operation. Also note that this product does not include short-circuit protection.

#### ratent pending on package assembly

### **Standard Application**

 $C_{in}$  = Required 330 $\mu$ F electrolytic  $C_{out}$  = Required 330 $\mu$ F electrolytic

## **Pin-Out Information**

Pin	Function	Pin	Function
1	Do not connect	13	GND
2	V <sub>out</sub> Adjust	14	GND
3	Vin	15	GND
4	Vin	16	V <sub>out</sub>
5	Vin	17	$V_{out}$
6	Vin	18	V <sub>out</sub>
7	Vin	19	$V_{out}$
8	Remote Sense GND	20	$V_{out}$
9	GND	21	V <sub>out</sub>
10	GND	22	Remote Sense Vout
11	GND	23	Do not connect
12	GND		

### **Ordering Information**

+5V Input	+3.3V Input	V <sub>out</sub>
PT6911□	PT6914□	= -2.0V
PT6912□	PT6915□	= -5.2V
PT6913□		= -1.5V

### PT Series Suffix (PT1234X)

Case/Pin Configuration	
Vertical Through-Hole	N
Horizontal Through-Hole	Α
Horizontal Surface Mount	С
(For dimensions and PC be see Package Styles 1300 an	oard layout, nd 1310.)

### **Specifications**

Weight	_	Vertical/Horizontal	_	26	_	grams

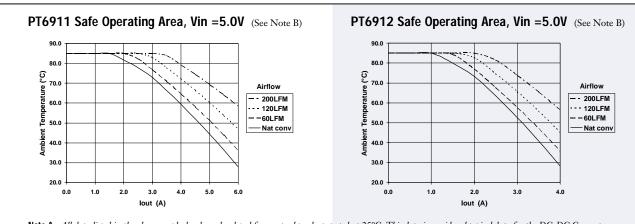

Notes: (1) ISR-will operate down to no load with reduced specifications.

(2) See Safe Operating Area curves, or consult the factory for the appropriate derating.

12 Watt 5V/3.3V Input Plus to Minus Voltage Converter

Note A: All data listed in the above graphs has been developed from actual products tested at 25°C. This data is considered typical data for the DC-DC Converter.

Note B: SOA curves represent the condition at which internal com-ponents are at or below manufacturere's maximum operating temperature.

# Adjusting the Output Voltage of the PT6900/PT6910 Positive to Negative Converter Series

The negative output voltage of the Power Trends PT6900 Series ISRs may be adjusted higher or lower than the factory trimmed pre-set voltage with the addition of a single external resistor. Table 1 gives the allowable adjustment range for each model in the series as  $V_a$  (min) and  $V_a$  (max).

**Adjust Up:** An increase in the output voltage is obtained by adding a resistor R2, between pin 2 (V<sub>o</sub> adjust) and pin 8 (Remote Sense GND).

**Adjust Down:** Add a resistor (R1), between pin 2 ( $V_o$  adjust) and pin 22 (Remote Sense  $V_o$ ).

Refer to Figure 1 and Table 2 for both the placement and value of the required resistor, either (R1) or R2 as appropriate.

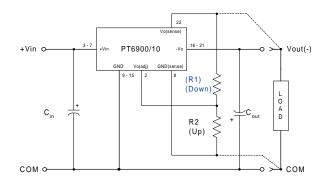

### Notes:

- Only a single 1% resistor is required in either the (R1) or R2 location. Do not use (R1) and R2 simultaneously. Place the resistor as close to the ISR as possible.
- 2. Never connect capacitors from  $V_{o}$  adjust to either GND,  $V_{out}$ , or the Sense pins. Any capacitance added to the  $V_{o}$  adjust pin will affect the stability of the ISR.
- 3. If the sense pins are not being used, the resistors (R1) and R2 can be connected to  $V_{\rm out}$  and GND respectively.
- 4. An increase in the output voltage must be accompanied by a corresponding reduction in the maximum output current. The revised maximum output current must be reduced to the equivalent of 12Watts.

i.e. 
$$I_{out}$$
 (max) =  $\frac{12}{V_a}$  Adc,

where V<sub>a</sub> is the adjusted output voltage.

Figure 1

The respective values of (R1) [adjust down], and R2 [adjust up], can also be calculated using the following formulas.

$$\begin{array}{ll} (R1) & = & \frac{24.9 \; (V_a - V_r)}{(V_o - V_a)} \; - \; R_s \; \; k\Omega \end{array} \label{eq:relation}$$

$$R2 = \frac{24.9 \, V_r}{(V_a - V_o)} - R_s$$
 kg

Where:

Vo = Original output voltage

V<sub>a</sub> = Adjusted output voltage

V<sub>r</sub> = Reference voltage in Table 1

 $R_s$  = The resistance given in Table 1

### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
