# FASTENERS FOR USE WITH PC BOARDS

## NUTS AND SPACERS/STANDOFFS

Type SMTSO - ReelFast® surface mount nuts and standoffs are available threaded and unthreaded - **PAGE 4**

Type KF2 and KFS2 - Broaching nuts, internally threaded for mounting on PC boards - **PAGE 5**

Type KFE and KFSE - Broaching standoffs, threaded or unthreaded for stacking or spacing - **PAGE 6**

Type KFB3 - Broach/flare-mount standoffs with greater pullout performance - **PAGE 6**

Type KSSB - Broaching, SNAP-TOP® standoffs feature a spring action to hold PC board securely without screws or threaded hardware - **PAGE 7**

## CAPTIVE PANEL SCREWS

ReelFast® surface mount captive panel screws - **PAGE 8**

Type PFK - Broaching panel fastener assemblies for mounting on PC boards - **PAGE 9**

## STUDS

Type KFH - Threaded broaching studs for use as solderable connectors or as permanently mounted studs on PC boards - **PAGE 10**

## RIGHT ANGLE FASTENERS

Type SMTRA - ReelFast® R'ANGLE® surface mount fasteners provide strong re-usable threads at right angles to PC boards - **PAGE 11**

## SHEET JOINING FASTENERS

Type SFK - SpotFast® clinch/broach mount fasteners for joining metal to PCB/plastic panels - **PAGE 12**

**MATERIAL AND FINISH SPECIFICATIONS - PAGE 13**

**INSTALLATION - PAGES 14-15**

**PERFORMANCE DATA - PAGES 16-17**

**OTHER FASTENERS FOR USE WITH PC BOARDS - PAGE 18**

### NOTE ABOUT PLATED THRU-HOLES

*Broaching and broach/flare types are designed for unplated thru-hole applications. If used in plated thru-hole applications, the stresses involved can damage the plating, push out the plating entirely, or break any traces inside the board that might be connected to the plated hole. Increasing the mounting hole size  $+0.005$ " to  $+0.008$ " /  $+0.13$  to  $+0.2$  may relieve these conditions. In non-plated thru-holes this will also help when delamination, measeling or crazing is evident after installation. When none of the above can be tolerated, we recommend Type SMTSO (surface-mount) type fasteners.*

*General recommendations for "Keep Out" areas are the same as our "Min. Distance Hole C/L to Edge" dimensions stated in the dimensional charts of our bulletin.*

# FASTENERS FOR USE WITH PC BOARDS

No matter how sophisticated or advanced, electronic components must be attached reliably and securely if they are to deliver optimum performance. We offer several fastener products for use with PC boards to satisfy component-to-board, board-to-board, and board-to-chassis attachment needs.

**ReelFast® surface mount fasteners** mount on PC boards in the same manner and at the same time as other surface mount components prior to the automated reflow solder process. The fasteners simply become another board component. This alleviates concerns about potential damage to PC boards due to improper secondary installation operations. The fasteners are provided on tape and reel compatible with existing SMT automated installation equipment. The benefits of using ReelFast® SMT fasteners are: faster assembly; reduced scrap; reduced handling; and reduced risk of board damage.

**Broaching fasteners** can also offer practical alternatives to “loose” hardware. A broaching fastener is a knurled-shank fastening device that can be pressed into a hole to provide a permanent, strong, threaded or unthreaded attachment point in PC boards. They can also be used in aluminum, acrylic, casting and polycarbonate components. Specially formed axial grooves around the shank of the fastener “broach” or cut into the material, creating a firm, interference-type fit resistant to rotation. In PC boards, broaching fasteners are recommended for use in non-plated holes.

**Broach/flare-mount standoffs** (Type KFB3) offer a combined broach/flare feature for even greater pullout performance in PC board materials.

## QUICK REFERENCE CHART

PEM Fastener Type	Page No.	Mounting Types				Primary Use

- (1) For plated studs, Class 2A/6g, the maximum major and pitch diameter, after plating, may equal basic sizes and can be gauged to Class 3A/6h, per ASME B1.1 (see notes at end of table C-1) and ASME B1.13M, Section 8, Paragraph 8.2.
- (2) See PEM Technical Support section of our web site for related plating standards and specifications.
- (3) HRB - Hardness Rockwell "B" Scale. HB - Hardness Brinell.
- (4) Optimal solderability life noted on packaging.

# FASTENERS FOR USE WITH PC BOARDS

## INSTALLATION

### For Types KF2/KFS2/KFE/KFSE/PFK

1. Prepare properly sized mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in drawing.
3. With punch and anvil surfaces parallel, apply squeezing force until shoulder contacts the board.

Part Number	D +.003" -.000"	G Min.
PFK-440-40	.173"	.250"
PFK-440-62	.173"	.375"
PFK-440-84	.173"	.500"
PFK-632-40	.190"	.250"
PFK-632-62	.190"	.375"
PFK-632-84	.190"	.500"

Part Number	D +0.08mm	G Min.
PFK-M3-40	4.5mm	6.4mm
PFK-M3-62	4.5mm	9.5mm
PFK-M3-84	4.5mm	12.7mm

### For Types KSSB/KFH

1. Prepare properly sized mounting hole in board.
2. Place fastener into mounting hole as shown in drawing.
3. With punch and anvil surfaces parallel, apply squeezing force until head contacts the board.

Part Number	D +.003" -.000"
KFH-440-L	.113"
KFH-632-L	.140"
KFH-832-L	.166"
KFH-032-L	.191"
KSSB-156-L	.216"

Part Number	D +0.08mm
KFH-M3-L	3.1mm
KFH-M4-L	4.1mm
KFH-M5-L	5.1mm
KSSB-4mm-L	5.49mm

### For Type KFB3<sup>(1)</sup>

1. Punch or drill properly sized round mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in diagram to the left.
3. Using a punch flaring tool and a recessed anvil, apply squeezing force until the shoulder of the fastener contacts the board. As the fastener seats itself in the proper position, the punch tool will flare the extended portion of the shank outward to complete the installation. The combination of broaching and flaring provides high pushout performance.

(1) PennEngineering manufactures and stocks the installation tooling for the KFB3.

# FASTENERS FOR USE WITH PC BOARDS

## INSTALLATION

### For Type SFK

- Step 1.** Prepare properly sized mounting hole in both panels.
- Step 2.** Using only Panel 1, with the punch and anvil surfaces parallel, apply squeezing force until the fastener is flush with the top of Panel 1.
- Step 3.** Place Panel 2 over fastener and apply squeezing force.

### ANVIL DIMENSIONS

Size	C ±0.13/±.003 (mm) / (in.)	Punch Part No.	Anvil Part No.*
SFK-3	3.05 / .120	975200048	970200229300
SFK-5	5.05 / .199	975200048	970200020300

\* Part number for anvil used in Step 2

**NOTE:** Fastener can be installed in both sheets at once when metal panel is adequately soft compared to the non-metal panel. E-mail [techsupport@pemnet.com](mailto:techsupport@pemnet.com) for more information.

### For SMT Nuts and Standoffs

### For SMT R'ANGLE® Fasteners

### For SMT Captive Panel Screws

(1) The values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure will affect results. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose or perform the installation for you.

(2) These are typical values for parts installed in drilled mounting holes. Punched mounting holes yield values approximately 15% less.

(3) Not applicable.

(4) See Application Data drawing on page 7.

#### PEMSERTER® PRESSES

For best results we recommend using a PEMSERTER® press for installation of PEM broaching fasteners. For more information on our line of presses check our web site.

### TESTING CONDITIONS

**Oven** Quad ZCR convection oven with 4 zones  
**High Temp** 518°F / 270°C  
**Board Finish** 62% Sn, 38% Pb  
**Board** .062" thick, Single Layer FR-4  
**Screen Printer** Ragin Manual Printer

**Vias** None  
**Spokes** 2 Spoke Pattern  
**Paste** Amtech NC559LF Sn96.5/3.0Ag/0.5Cu (SAC305) - Lead-free  
**Stencil** .0067" / 0.17 mm thick

(3) With lead-free paste. Average values of 30 test points. The data presented here is for general comparison purposes only. Actual performance is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with the performance data specific to your application.

(4) Further testing details can be found in our website's literature section.

# FASTENERS FOR USE WITH PC BOARDS

## OTHER FASTENERS FOR CONSIDERATION TO USE WITH PC BOARDS

### TYPE PF11MW™ FLOATING CAPTIVE PANEL SCREWS

(See PEM® Bulletin PF)

Unique flare mount feature allow fasteners to “float” in mounting hole.

- Compensates for mating thread misalignment.
- Installs into any panel material.
- Appropriate for close center-line-to-edge applications.
- Color coded knobs available.

### TYPE PF11MF™ FLARE-MOUNTED CAPTIVE PANEL SCREWS

(See PEM® Bulletin PF)

- Appropriate for close centerline-to-edge applications.
- Doesn't require high installation force.
- Installs into any panel material.
- Installs flush on back side of panel.
- Color coded knobs available.

### TYPE SOAG/SOSG GROUNDING STANDOFFS

(See PEM® Bulletin SO)

- Designed for clinching into steel or aluminum chassis.
- “Gripping teeth” on opposite side of standoff firmly contact mating PC Board.

### TYPE SKC KEYHOLE® STANDOFFS

(See PEM® Bulletin SK)

- Clinch feature mounts fastener permanently into metal sheet.
- Allows for quick attachment and detachment of PC Board.
- Head is flush or sub-flush in metal sheet.
- Makes horizontal or vertical component mounting possible.

### TYPE SSA/SSC/SSS SNAP-TOP® STANDOFFS

(See PEM® Bulletin SSA)

- Spring action holds PC Boards and subassemblies securely, while allowing for quick removal.
- Screws and other threaded hardware are eliminated.
